## Unlocking Your Youthful Self

We all desire to refresh and invigorate our appearance as we age - but natural aging can leave noticeable impressions on our skin due to diminished collagen production. This can contribute to the formation of wrinkles and laxity in the skin. PLASMAGE® is the key to reclaiming a more youthful you, thanks to its advanced treatment approach.

### What is PLASMAGE® ?

PLASMAGE® is a non-invasive skin treatment designed to effectively address various skin concerns and revitalize the skin using the power of plasma energy. It is ideal for treating fine lines, wrinkles, skin tone, texture, xanthelasma, skin tags and more.

# PLASMAGE®

FRACTIONAL PLASMA TECHNOLOGY  
FOR SKIN REVITALIZATION

### How does the PLASMAGE® treatment work?

PLASMAGE® delivers plasma energy to the tissue by the ionizing of gas in the air. Plasma is delivered through a small probe or applicator. The probe is applied to the surface of the skin without direct contact creating microinjuries. Because small dots of energy are applied to the treatment area, the skin undergoes a more rapid healing process. You may experience some redness for 24-72 hours but can resume regular activities embracing your revitalized appearance while the plasma energy beneath the skin's surface continues to exert its effects over time and provide long-lasting results.

### How long is a typical treatment session?

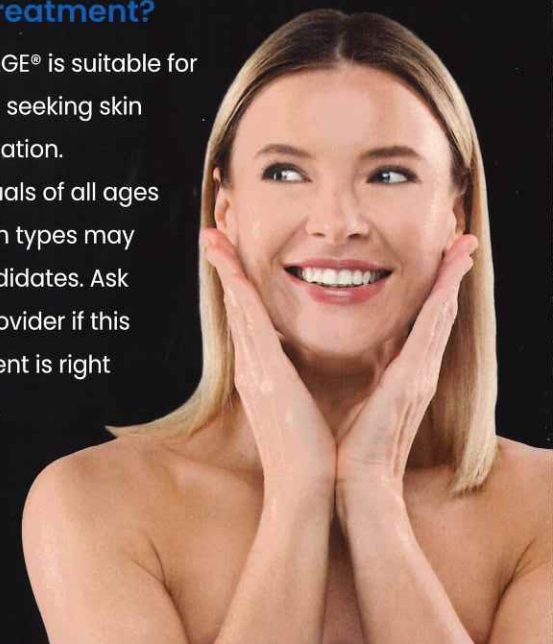

Treatment sessions are relatively short. The entire procedure typically takes about 15 minutes depending on the size of the area being treated.

### Does it hurt?

We prioritize your comfort. As in the case with most device treatments, topical numbing cream or anesthetic is applied to the treatment area. Following the treatment, light cooling or REPAIR Skin Revitalizing Serum may be applied to reduce inflammation and soothe the skin.

### Am I a candidate for this treatment?

PLASMAGE® is suitable for anyone seeking skin revitalization. Individuals of all ages and skin types may be candidates. Ask your provider if this treatment is right for you.
