

WHY SCARLET SRF?

Scarlet SRF is a versatile tool that empowers physicians to provide their patients with face, neck, and body skin tightening and rejuvenation. Scarlet SRF distributes RF energy through 25 non-insulated microneedles using the patented "Na Effect", creating electrocoagulation of soft tissue. This generates the creation of dermal collagen and elastin fiber in the epidermal and dermal layers of the skin.

Scarlet SRF is one of the safest aesthetic devices, delivering revolutionary skin tightening results. Treatments are virtually painless with minimal downtime for your patients.

KEY BENEFITS

- The patented "Na Effect" offers reduced treatment times, comfort, and optimal patient outcomes
- Lowest consumable cost on the market, maximizing ROI for your practice
- Safely & effectively treats all skin types in fewer treatments
- Unique scalp, face, and body protocols
- Delivers energy to the skin in intervals of less than 300 milliseconds
- Energy at 2MHz vs 1MHZ

"I know I have a good one [non-surgical device] when every single one of my staff of 20 are using it. That's when I know we've got a game-changer and that's been the case with Scarlet SRF."

-Dr. Lee Thornton, MD, FACS
Meridian Plastic Surgery

SCARLET

SRF

A REVOLUTIONARY
SHORT-PULSE RADIOFREQUENCY
NON-SURGICAL SOLUTION

"The Na Effect makes Scarlet SRF such a superior microneedling radio frequency system. The reason is in the design of the needles..."

-Dr. Raminder Saluja

SCARLET SRF TARGETS:

- SCALP SKIN TIGHTENING
- FACE SKIN TIGHTENING & LIFTING
- DOUBLE CHIN, NECK & BODY SKIN TIGHTENING
- NECK REJUVENATION
- BODY SKIN TIGHTENING

And is clinically proven to improve:

- SKIN TEXTURE, PORES & PHOTOAGING
- ACNE VULGARIS
- SCARS, STRIAE, ETC

FDA Clearance

Scarlet SRF is indicated for use in dermatologic and general surgical procedures for electrocoagulation and hemostasis.

THE SCIENCE Behind the "Na Effect"

The "Na Effect" essentially mimics a monopolar delivery, but in a bipolar fashion, by creating an independent zone of coagulation around each needle. While previous RF systems were only able to produce a widespread area of coagulation around the targeted area, leading to often ineffective treatments with minimal results, the Na Effect maximizes treatment potential.

The proven science behind the Na Effect is what allows Scarlet SRF to deliver consistent and effective outcomes for all skin types.

Competition - without Na Effect

- More painful treatments - multiple passes required
- Longer treatment times - taxing to the operator
- Bleeding is common

Scarlet SRF

- Only a single pass required
- Independent coagulation around each electrode
- Smooth & consistent robotic motor delivery
- "Na Effect" in combination with fast treatment creates a better patient experience
